23. Problem: (use additional Sheets if necessary) The 920 documents have been updated with the registry database mapping however the DAACs did not receive the request to allocated space (data and log) on the 'icg01' servers for the installation of EcCsRegistry_<MODE> that we will deliver in a 5B Patch to Drop 5B03.						
24. Proposed Solution: (use additional sheets if necessary) Request DBOs at the DAACs to allocate 300 MB data 150 MB log on the icg01 servers listed on the 920s with this CCR. Also this information has already been posted to the documentation website. ref: CCR 00-0522 for 5B						
25. Alternate Solution: (use additional sheets if necessary) There are no alternate solutions to this request given that EcCsRegistry database will be delivered in Drop 5B. patch to the DAACs within a day or two. Note: There is no impact to the VATC and PVC a documentation typo change is being made to their 920's.						
26. Consequences if Change(s) are not approved: (use additional sheets if necessary) All of the DAACs may not be aware of the data and log sizes needed to implement the install of the EcCsRegistry database.						
27. Justification for Emergency (If Block 15 is "Emergency"): The EcCsRegistry database is being delivered to the DAACs within the next patch to Drop 5B.03.
